

Appl. No. 10/066,986  
Amendment and/or Response  
Reply to Office action of 1 February 2005

Page 2 of 11

**Amendments to the Specification:**

Please replace the paragraph beginning at page 6, line 18 with the following rewritten paragraph:

This ensures a considerably more economical use of glass, as is shown in FIG. 6. Now, tolerances (indicated by the double arrow d' in FIG. ~~5~~6) must be taken into account, which tolerances are mainly determined by the small dimensions of the lines along which scribing and breaking takes place (line 13 in FIG. 7A). The line of intersection 13 may then lie between the sealing rims 7, but also intersect it, as is shown in FIG. 7B.
